Summary

Motivated and detail-oriented data science enthusiast with a strong foundation in Python, SQL, Data Analysis, and machine learning. I have hands-on experience in exploratory data analysis (EDA), developing predictive models, and deriving meaningful insights to support data-driven decision-making. I value teamwork, adaptability, and continuous learning, and aim to apply my skills to solve real-world business problems.

Experience

AI Variant	Hyderabad, India
Data Science Intern	

Education

Anurag University Hyderabad	2021-2025
B.Tech Computer Science Engineering	
CGPA : 8.29	
TSWRJC Nelakondapally Khammam	2019-2021
Intermediate(MPC)	
GPA : 9.18	
ZPHS Banapuram Banapuram	2019
High School (SSC)	
GPA : 8.5	

Projects

Telecommunication Churn Prediction

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Flask

- Performed end-to-end data preprocessing, including missing value handling, encoding, outlier treatment, and feature engineering to improve model quality.
- Conducted detailed exploratory data analysis (EDA) to identify key churn factors such as contract type, tenure, and monthly charges.
- Built and evaluated multiple machine learning models using Scikit-learn, and finalized a Gradient Boosting Classifier for high-accuracy churn prediction.
- Developed and deployed a Flask-based web application for real-time churn prediction, making the model accessible through a clean user interface.
- Created visual insights using Matplotlib and Seaborn to support business decisions aimed at reducing customer churn.

Resume Classification System

Technologies: Python, Pandas, NumPy, Scikit-learn, NLP, Gradient Boosting, Streamlit

- Built a machine learning model to classify resumes into job categories using NLP-based text embeddings and a Gradient Boosting Classifier.
- Performed text preprocessing, feature extraction, and EDA to improve model clarity and performance.
- Evaluated the model using accuracy metrics and confusion matrix.
- Developed a Streamlit web app that allows users to upload resumes and receive real-time category predictions through a simple interface.

Skills

Programming languages

Python | R | SQL | Java | HTML | machine learning frameworks

Soft Skills

Problem-Solving | Communication Skills | Teamwork & Collaboration

Machine Learning Skills

Data preprocessing | Feature Engineering | Model Training & Evaluation |Data Science Concepts

Tools & Platforms

Jupyter Notebook | Google Colab | Visual Studio | MS Office | Tableau

Certifications

Data Science Certification

ExcelR

Completed comprehensive training in Data Science, Python, Machine Learning, SQL, and Data Visualization.

Java Full Stack
